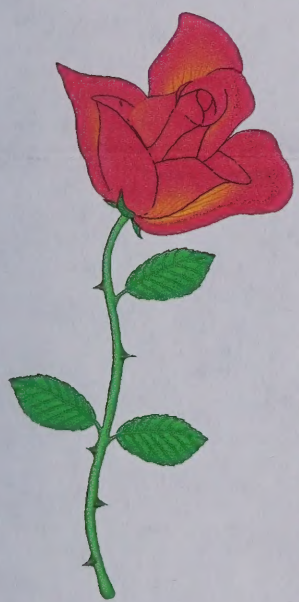
THREE NEW PSYCHOTHERAPY GROUPS FOR WOMEN

Group 1: Women who are questioning their sexuality. This group is for women who have wondered about being lesbian or bisexual and desire a safe place to meet other women who are also questioning/exploring their sexual orientation.



Group 2: Women who have been treated for sexual abuse, incest or rape and who want to explore related issues in depth. This group is for women who have begun to heal from the trauma of sexual abuse. In depth issues of trust and building healthy relationships, among others, will be addressed.

Group 3: Women who have been treated for serious mental illness, who are now stabilized and in ongoing, regular treatment and who desire a supportive, understanding group to help cope with the challenges of life.
